TO: Memo to Noncoal File

FROM: D. Wayne Hedberg, Permit Supervisor *DWH*

RE: Follow-up to Meeting with A.J. Cornell, Castle Valley Mining Company, White Cap #8 Gypsum Mine, PRO/015/033

On June 18, 1986 Division staff members D. Wayne Hedberg and David Wham met with Mr. A.J. Cornell of Castle Valley Mining Company. The purpose of the meeting was to discuss the remaining concerns and deficiencies regarding his permit application for the White Cap #8 Gypsum Mine.

Mr. Cornell stated he had not received our June 12, 1986 letter yet as he had been out of town for the last week. The letter was gone over with Mr. Cornell and another copy hand delivered to him at the conclusion of the meeting. In summary the following material was discussed:

- (a) Mr. Cornell was informed that the \$25,000 BLM bond would be adequate for our reclamation purposes. However, we would require a copy of the same after it had been filed and accepted by the BLM.
- (b) Mr. Cornell was told why his original MR-1 application had been revised, and that he was to compare it with his original application for accuracy. The revised application was to reflect our understanding of the current status of proposed changes agreements and commitments which Castle Valley Mining will follow regarding the proposed mining operation. He stated he had read it and was ready to sign the revised form.
- (c) While in our office Mr. Cornell signed two copies of the revised MR-1 form and had Marjie Anderson notarize and date the application. One copy was given to Mr. Cornell and one was filed.

- (d) Mr. Cornell was informed that the Division would now proceed to prepare a public notice for the newspapers which would inform the public of our intent to tentatively approve of the project.
- (e) Mr. Cornell was instructed to proceed ahead with arranging his \$25,000 bond with the BLM. Upon BLM acceptance, he is to submit a copy of the signed bond form to this office. He was told we could not issue a final permit to commence operations until the end of the 30-day public comment period and until we had a copy of the BLM bond.
- (f) Mr. Cornell was also informed of our recent discussions with Mr. Broadhead of the State Health Department, Bureau of Air Quality and their possible permit requirements for an air quality permit for his gypsum mining operation. He was told that Mr. Broadhead would be sending him a letter requesting information about his operations and that an air quality permit might be required. It was suggested that he give Mr. Broadhead a call to confirm.
- (g) Mr. Cornell was told that it would be the end of July of this year before we would be prepared to issue a permit. Again this is assuming no adverse public comments and filing of the reclamation surety. He stated this would fit in appropriately with his plans for development.
